Re: Support for Isleton Bike and Pedestrian Master Plan Grant Application

Dear Mr. Cáceres:

Please consider this letter of support from the Delta Protection Commission for the grant program for the City of Isleton Bicycle and Pedestrian Master Plan Grant Application. The Delta Protection Commission has been working closely with the City of Isleton to gather support for the Great California Delta Trail System. The Trail is anticipated to run through the City of Isleton on a trail system that the City is developing along the Sacramento River Waterfront and State Highway 160. We anticipate this system will be integrated into the City's plans and be mutually beneficial to both agencies in the development of non-motorized transportation and recreation in the Delta Region.

The staff of the Delta Protection Commission strongly urges the SACOG staff and the SACOG Board of Directors to fund this important project.

Sincerely,

A handwritten signature in cursive script that reads 'Linda Fiack'.

Linda Fiack
Executive Director
